House 09, Road 04, Block B, Green Model Town, Mugda, Dhaka-1362

CAREER OBJECTIVE

Passionate Junior Frontend Developer skilled in React, Next.js, and ES6+ JavaScript, focused on building responsive, user-friendly web applications. Successfully developed dynamic interfaces and implemented secure user authentication to ensure smooth digital experiences. Eager to contribute clean, scalable code to a dynamic team and grow through real-world challenges.

SKILLS

Technical Skills

- **Frontend** — HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript (ES6+), React, Next.js
- **Backend** — Node.js, Express, RESTful API Design & Integration
- **Database** — MongoDB
- **Tools & Version Control** — Git & GitHub

Interpersonal Skills

- Problem Solving • Attention to Detail • Communication • Adaptability • Team Collaboration

PROJECTS

1. DriveFleet — Car Rental Platform [Live](#) | Client: [GitHub](#) | Server: [GitHub](#)

Full-stack car rental platform to browse, book, and manage car listings with a JWT-authenticated user dashboard.

- Browse & search cars by name/type; detailed info view before booking
- Booking system with driver option, date tracking, and booking history
- Secure JWT/cookie auth and Google login protect private routes to add, update, and delete listings.

Technologies Used: Next.js (App Router), Node.js, Express.js, MongoDB, JWT, Tailwind CSS

2. SunCart — Summer Essentials eCommerce Store [Live](#) | Repo: [GitHub](#)

Responsive eCommerce app for summer products with BetterAuth authentication and protected product detail pages.

- Product browsing with image, price, and rating cards across categories
- Seamless Google and email login unlocks protected routes, allowing authenticated users to view premium product details.
- User profile management with toast notifications and responsive UI

Technologies Used: Next.js (App Router), MongoDB, Better Auth, Tailwind CSS

3. KeenKeeper — Friendship Tracker Platform [Live](#) | Repo: [GitHub](#)

Responsive web application designed to track user interactions, maintain relationship goals, and visualize communication patterns over time.

- Check-in quickly to log calls, texts, or video chats with immediate real-time timeline and activity updates.
- Browse full communication history with instant search, category filtering, and precise newest-to-oldest time sorting.
- View interactive pie charts that deliver an instant, real-time breakdown of your overall relationship habits.

Technologies Used: Next.js, Tailwind CSS, Recharts, Context API
